“ A PEACEFUL WORLD “ these can exactly describe what all of us, want to have. People say: “*Peace is easy to be achieve if only we’ll make a way to attain it*” and I say: “*Yes! We can surely find a way to attain it.*” If people will just open widely their eyes, they would see how beautiful the world is with PEACE. As we can see in other places, most of the people still doing things which may result cruelty to others. But despite the cruelty, they still open their minds and find forgiveness in their hearts. They set aside the unpleasant memories of what had happened and they just leave it in the past. One thing also is about our different religions. Quarrels sometimes starts with two different religions and slowly can affect others beliefs. That’s why PEACE must start first within ourselves and that’s the time for us to help others to find peace within their selves. We should also trust and strengthen our faith to God.

In order for us to have a WORLD PEACE, we should identify our do’s and don’ts, think of the limitations, minimize violence, think of our social needs, and most especially be God-centred living human being and at the same time be a good role model of a good person to others. Keep in mind that the unpleasant memories of cruelty and violence are things of the past. We should not bring it up to the future so that the good memory which permanently have stayed in us will also help us to start a new beginning going to a peaceful world that is worth living in. The real and true God servants are those who strive hard to make the WORLD a PEACEFUL home for mankind.
