The absence of war and harmonious relationship between every nation can be the most perfect way to have **WORLD PEACE**. It is in this sense that each one of those are working hand and hand for the continuous development and improvement of our land so as with the standardization of our lives.

World Peace, can be obtained first when people now starts to think positively, this idea came up with me because there came many instances where in people can have peace with in themselves when they start to think about the good things that they dream to have in life.
