Just imagine a time where tranquility, happiness and serenity prevails. That would history, real world peace and security never stayed along mankind. It was always the opposite. Suffering, pain and violence abound our lives. We could wonder, when will peace be along mankind? Peace, however is attainable. The remedy lies within each of us. If only we change our way of lives for the better and focus on advocating worldly peace. Then, yes --- peace shall be be nice, even a time of total bliss. But, we could only imagine such time, aren't we? Well, we call that PEACE. It is a five – letter word that holds great significance within our hearts and minds. Would you agree?

Definitely yes! We long for peace ---- before and even now. For thousand of years, we, humans have sought peace and even security. But it seems that PEACE has eluded mankind. It has never been with us... That's reality, and we could say that. Throughout at hand.
