Peace is a rare commodity in today's world. This is evident in the dissatisfaction and worries of individuals and through a lack of proper understanding between the people of different nations. World peace is necessary for a meaningful and peaceful life together. In a world where there is great diversity in personal, social and culture ways of being and living procession of significant human values can overcome these differences and ensure peace and solidarity.

Peace must begin with each one of us. Through quite and serious reflection on its meaning, new and creative ways can be forced to foster understanding, friendship and cooperation among people.

Well, every one of us should make peace with our surroundings. I do believe that we can have this world peace if we know how to understand each other. Stop quarreling...stop war and let us bring peace.
