Zamboanga City, Philippines

People, animals and plants and all living things live in this world. Our environment is one of the most beautiful gifts of God. Since this is the special gift that God has given to us, we need to preserve and take care of it.

Sad to say, every year our country suffers from floods, landslides and soil erosion. Every year many people die and suffer because of the typhoon. This happens because there are no enough trees to absorb the water and we are among who destroy the environment.
