

The Earth

Merilyn Jailani

Bachelor of Science in Radiologic Technology

School of Allied and Medicine

Universidad de Zamboanga

Zamboanga City, Philippines

Earth is important to us because we are free to do what we want in life. We can only live on earth and not in Mars. Earth is a nice, peaceful and fresh place if there is unity, love and understanding among people living together. Today the earth is very weak because of destructive activities like cutting down trees and throwing garbage anywhere. Without the earth, we can never survive.
