“Human Rights”

We all know everybody has the human rights, but depends on a situation. You can say what you want, and do what you want, but be sure it is in the right way and not against by the law. You have to listen one's opinion and explanation, so that you could understand about their situation, not only to listen about yourself because everyone has the right to express their opinion and suggestion. There is also a case that if you think your right you have to pursue and fight for your right, because you know by yourself that it is reasonable to fight for your human rights.
