Zamboanga City, Philippines

Peace. What is peace? Where does peace start? How can we develop peace? There are many questions comes into our mind when we talk about it. We know and we observe that in different places here in our country peace and order is not well developed. Peace starts from ourselves because if we don't have peace in ourselves how can we have peace to others? We should understand and hear the shouts of our people so that there will be no misunderstanding. But we should love each other and show care. Peace and development in one country is very important, because if we have that we will join forces and our country will be in progress.

What is life if peace and development was developed? Maybe life will be so good and there will be peace also in our heart. Because if children or the future children will make up and grow in a peace country it will be so good. Because what we are doing now will reflect to the children. So, we need to show them all good attitudes.
