“Environment”

What do you think is the best way in taking care of our precious environment? Probably there are such many ways to do so if we're just aware of the happenings in our surroundings. Environment is important for us individual to share our appreciation, knowledge and concern to contribute more for the specific welfare to avoid many illness and disease. Environment can help us to become healthy in future and perhaps for the present.

Live in a community that builds a stronger patriotism in taking care of our environment; for this reason we can assure to ourselves that 100% of our lives is safe and protected by our knowledge. People involved in this issue because we're the one who makes destruction and problems regarding the said consequences we're facing nowadays like global warming and more. Environment is one of our needs in order for us to survive in this world because without environment life is incomplete. We're being tested by our saviour who gives lots of love and concern about our nature. Try to keep a genuine heart for your selves and community.

As a human and for 17 years of existence, I was able to differentiate good from bad; cause being wise , you're able to conserve and develop things in just a matter of clicking the thumb. Let's work hand in hand to build a well organized environment to make it realize and feel the real essence and significance of it. Clean and green environment id our great and big achievement for our society and for ourselves.
