**Environment**

Environment is the place where we will be living, an area where any territory belongs and free of what it may deal with people. Without environment we cannot have individual shelter to warmth, and even those various animals may die. With environment people can have an air to breathe with a presence of our mother nature and in a way to get food. Environment is a place where people know where they go. It is a part of every individual to deal with any aspects to handle their very own life. It is the attitude where we will be able on how to adjust and embrace of what happens around. To cope up with failures and frustrations that it may come up with any individuals. With environment we will be able to accept of whatever happens and possibly come into our lives. Starting with ourselves we will be able to accept of what we have in a way of realizing of what are happening around us and surrounds us.

With that, people can unite and coordinating each other in a way of accepting. It is a nature that in a place or territory where people uniting to make as one. Like in a particular classroom, a group of students meets up and deals with each other to make as one. And with that environment, we will belong in any place and time wherever we will go and whatever happens. And with that environment, we called "PEOPLE"--- who takes care and to make use with it. It is important to handle it with patience and acceptance, because from the start of our living since we were born, all of us make deal to embrace around us; to have a peaceful and happy life. Environment is a part of people, and people are a big part of environment.
