

ENVIRONMENT  
JOSE, MARLEN K.  
School of Allied Medicine  
Universidad de Zamboanga  
Zamboanga City, Philippines

A clean and green environment which God greatest creation to our earth, thru clean environment people live longer and live healthy lifestyle. Because of the good creation of God, people abused it, people dispose the garbage anywhere and people now a day are not aware what's happening in our environment.

The floods, earthquakes are the worst tragedy happens now a day which people may suffer. They might even thinking people is the cause of it. If people do appreciate the greatest creation of God this tragedy won't happen.

In our city the environment is not good because it is over populated and the garbages are all around due to the people who live in the streets and dispose their garbage in uncertain place which not be the better place for it. It cause a unhealthy living because of the sickness they can get to it. Although we have medicines to cure but some of it is very expensive that some of them can't afford to buy and i believe that "Prevention is better than cure" CLEANLINESS OF ENVIRONMENT START'S ON US.
