Zamboanga City, Philippines

Environment is defined as all the things and the people around you, like what's in your place, in your home, or even in the school. It is considered as environment. People are big part of the environment as they are the one who take good care of it and it depends on them what will be the result of the environment they belong to. Some people are treating the environment with a proper care like by simply throwing their garbage on the proper places like in the trashcan, but other are destroying it. The forest is an example of the environment we are in and it can give us many benefits like giving us fresh air and having its fresh air and beautiful atmosphere. Environment is God given gift to us so we must take good care of these gifts. Here in the Philippines we are known to have a beautiful environment but there are many Filipino people who are destroying it and now us we all know this environment of us are beginning to be destroyed. Our attitudes depend on what environment we belong and people may bring these attitudes anywhere they go.
