Peace is the most essence the most important factor in every man, which lives in a particular country. That undergoes a development and going to a prosperous country. We all like that kind of a development. Like in my place that I was born in Zamboanga City.

I have so many experiences that I encounter ,but being a Christian I will show to them and be a model for having a GOD in my heart that full of love of one another , and love your neighbors us your self.

We all know that every mistake, we have the right to speak, to show the truth , But now a days the terms of rights have a some other definition ,if we have no money and no power, we have no rights to speak the truth. I hope the government will open there eyes and heart,

of what is really the problem of every citizen. And therefore we have a balance humans rights.
