Zamboanga City, Philippines

In my opinion a world of peace is prissily wonderful fantastic, but actually a world peace meaning it is a public general that class of persons devoted to the affairs, interest, or pursuit of this life, example earth or it is a part of it.

If we mean world peace we should make characterized by free from war! Some Christians somehow they all condemned all Muslims all Islam's are worse or a bad people in this earth. Generally to the Moro's people who lived people they don't like to the strife, the commotion, violence or disorder to pertaining not quarrel some.

Like a human being same with us Muslims are like peace of mind .they like freedom we don't tolerance that they are not also worsted they are good friends too. Because us a student, I have also many friends Muslims and all of them are very good friends for me.

A cessation or absence of hostilities between nations some humanity had war between people or groups because no public or tranquility. I mean we don't have peaceful mind. If war had conflicted too and a war a fare among against poverty a war bet, Two neighboring nations and a warm fighting because of pride and because of professions, Their no Peace!
