Zamboanga City, Philippines

World peace is possible but almost impossible to achieve this wrld peace. People must have to create a new world with new human being that they would never fight and they would live as family, in peace and harmony to finally find the dream of every people.

As what I've observed here in our country World peace is almost impossible because of the money, the problem is what people do to obtain is richness. Money is the responsible for most of the biggest reason why people cannot obtain the world peace, example of this is the crime that always on the news, and also the political reason that happen in Maguindanao massacre, etc.

But could you realize that the real mean of the world peace, begin first through our self on how to commit this; discipline, respect the right of the other as what you respect yourself and many other factors that could affect the world peace.
