Zamboanga City, Philippines

We Filipinos people are willing to learn and to be educated. From that being educated we can do things that are impossible. Many people especially child are not able to go to school just because of lack of money. And as we all known that one of the problem here in the Philippines is that the population of the persons that can't able to go to school is higher than the total population of the student that went to school just because of the problem wherein our government wasn't able to solve this. And also we are lucky that one Pilipino has been awarded because of his patient to give education those who can't afford to go school. Education is very important because we can learn of what can't learn in our house.
