**Peace** describes a society or a relationship that is operating harmoniously and without violent conflict. Peace is very imperative for every country as it is the fundamental element to become a triumphant nation. Countries that are undergoing war couldn't ever achieve success, Palestine as a living proof – children did not go to school for education, family lost their loved ones, food is in a severe condition, bombing of the buildings and city, spread of infectious diseases and many more! Those are the effect of **WORLD WITHOUT PEACE**. On the other hand, countries such as Malaysia which is a multi-racial yet are able to maintain their harmonious relationship among its citizens is the key to what they have attain now, a fast-developing realm. In facing the modern society today, all the people in the world are striving hard to aim for the unpredictable. Little do they know that peace is the means that holding them firmly to what they have accomplished today?

Peace can be categorized into many groups. There are peace in religion. We are co-exist together in this world with too many different beliefs. That is why peace and understanding is very important for us in order to bring out the sense of respect among us. Other kinds of peace is inner peace (or peace of mind) that refers to a state of being mentally and spiritually at peace, with enough knowledge and understanding to keep oneself strong in the face of discord or stress. Being "at peace" is considered by many to be healthy and the opposite of being stressed or anxious. Peace of mind is generally associated with bliss and happiness. Moreover, there is also a **peace movement** which is a social movement that seeks to achieve ideals such as the ending of a particular war (or all wars), minimize inter-human violence in a particular place or type of situation, often linked to the goal of achieving world peace. Means to achieve these ends usually include advocacy of pacifism, non-violent resistance, diplomacy, boycotts, moral purchasing, supporting anti-war political candidates, demonstrations, and lobbying to create legislation. Since there are many types of peace, the living human comes up with an idea to build a main organization that deals with all kind of peace and human rights. United Nation (UN) is the outcome. The United Nations (UN) is an international organization whose stated aims are to facilitate cooperation in international law, international security, economic development, social progress, human rights, and achieving world peace. The UN was founded in 1945 after World War II to replace the League of Nations, to stop wars between countries, and to provide a platform for dialogue.

To sum up, peace is what make us become what we are today. Can we feel the happiness og being together without peace? Can we become a successful icon if it wasn't because of peace? Can children enjoy their life to the fullest if peace isn't there? Funny as it sounds may be, I can't even write this essay without peace!
