Universidad de Zamboanga
Zamboanga City, Philippines

Concern in the environment is all about how we care our community and other concern related to our environment, we can say that our environment is our life because we live in earth, we people have lots of responsibility to maintain our mother earth because it is the one who sustains a precious and vivid tapestry of life and we need to give attention to it, it's because our environment influences all the external factor influencing the life and activities of people, plants and animals. We depend to it and if we don't protect our environment there is a possibility that many people and animals will suffer especially from food and not only that the same thing also with our economy, now a days we experience global warming, this global warming results to increasing world temperature believe to be caused in part by the greenhouse effect, this is a sign of not giving attention even just a simple thing that helps prevent global warming, but it's not too late to help, we people can still find a way, like minimizing harm to natural world by using biodegradable ingredients, having environmental impact or consequence of human action on nature, the indirect and direct consequences of human actions on the natural environment, having environment health where in a local government is the one who is responsible in monitoring environment health concerned with minimizing risks to public health including the monitoring of water and air quality hygiene in restaurants and stores and pest control

We people are much involved regarding to the issues relating to the protection of the natural world especially a member of a political group campaigning against the perceived harmful effects of industrialized societies. Those thing are possible if we work hand and hand and by having perseverance of what we are doing for the betterment of our environment. Concern in the environment is also a set of external conditions, especially those affecting a particular activity like the home of our environment and a stimulating learning environment, our environment is the one who protect us from any disaster, rather than destroying it, it's better if we will improve it. Concern in the environment is a big deal for us, because we will try are best to come out just to help improve our environment that benefit many people in just a simple help. Our environment is our life so we must protect it, because sooner or later all of us will benefit those things, especially now a days there are lots of diseases that leads us to sickness, so let's us be environment friendly.
