

Concern in the Environment

RONIESYLL D. MAGTORTOL

School of Allied Medicine
Universidad de Zamboanga
Zamboanga City, Philippines

As a student we should know how to care our environment . From elementary to college our teachers always remind us that we should love and care our environment. A simple example of this is by separating our garbage from non-biodegradable and biodegradable.

Sad to say we do not put that on our mind because I saw a lot of student nowadays throwing their garbage to everywhere and these can cause to air pollution and now we encounter a lot of disaster . But it's not the end of everything we can still save Mother Earth, let us throw are garbage in a trashcan .Let us not cut trees and other illegal works to save Mother Earth. Let us love our ENVIRONMENT.
